

Strategy Report

Argus Low Carbon Hydrogen

Table of contents

Table of contents

Executive summary

- Overview of the study
- Asia Pacific (APAC) and the Middle East region hydrogen supply and demand summary
- Demand oriented country and supply oriented country identification
- Regional total and firm low-carbon hydrogen supply overview

Introduction to hydrogen

- Hydrogen specification and definitions (grey, blue, and green)
- Countries with hydrogen strategy (global perspective)
- Current use of hydrogen
- Different hydrogen production routes
- Existing and new application of hydrogen in different sectors

Country level analysis

Japan

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment
- Funding: Funds/support scheme related to development of hydrogen economy
- Supply: Japan's domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Demand summary
 - Sector specific overview and corresponding sector hydrogen development plans
 - Comprehensive long-term hydrogen demand analysis for transport and power generation sector
 - Long-term breakeven price analysis for transport, power generation, steel, gas-grid, and refining sectors

South Korea

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment
- Funding: Funds/support scheme related to development of hydrogen economy
- Supply: South Korea's domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Demand summary
 - Sector specific overview and corresponding sector hydrogen development plans
 - Comprehensive long-term hydrogen demand analysis for transport, power generation, and gas grid sectors
 - Long-term breakeven price analysis for transport, power generation, steel, and gas-grid sectors

Australia

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment

Table of contents

- Funding: Funds/support scheme related to development of hydrogen economy
- Supply: Australia's domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Sector specific overview and corresponding sector hydrogen development plans
 - Hydrogen demand from existing grey hydrogen consumption replacement (fertilizers)
 - Long-term breakeven price analysis for fertilizers, transport, power generation, steel, and gas-grid sectors

India

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment
- Funding: Funds/support scheme related to development of hydrogen economy
- Supply: India's domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Sector specific overview and corresponding sector hydrogen development plans
 - Hydrogen demand from existing grey hydrogen consumption replacement (fertilizers and refinery)
 - Long-term breakeven price analysis for fertilizers, refinery, transport, steel, and gas-grid sectors

China

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment
- Supply: China's domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Demand summary
 - Sector specific overview and corresponding sector hydrogen development plans
 - Comprehensive long-term hydrogen demand analysis for transport sector
 - Long-term breakeven price analysis for transport, and steel sectors

Middle East

- Middle East summary
- Region supply-side summary

Oman

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment
- Supply: Oman's domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Sector specific overview and corresponding sector hydrogen development plans

Table of contents

- Hydrogen demand from existing grey hydrogen consumption replacement (fertilizers and refinery)
- Long-term breakeven price analysis for fertilizer, refining and steel sectors

Saudi Arabia

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment
- Supply: Saudi Arabia's domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Sector specific overview and corresponding sector hydrogen development plans
 - Hydrogen demand from existing grey hydrogen consumption replacement (fertilizers and refinery)
 - Long-term breakeven price analysis for fertilizer, refining and steel sectors

United Arab Emirates (UAE)

- Country Overview: Country scorecard, key indicators, decarbonization targets and policy
- Hydrogen strategy and assessment
- Supply: UAE domestic low-carbon hydrogen supply
- Demand:
 - Country assessment
 - Sector specific overview and corresponding sector hydrogen development plans
 - Hydrogen demand from existing grey hydrogen consumption replacement (fertilizers and refinery)
 - Long-term breakeven price analysis for fertilizer, and refining sectors

Sustainable Aviation Fuel (SAF)

- Introduction to SAF
- Asia Pacific (APAC) and Middle East SAF policy discussion
- APAC and Middle East long-term aviation fuel and hydrogen demand analysis
- Potential SAF export market analysis:
 - Potential export market-East of Suez overview
 - EU SAF policy coverage
 - Long-term EU SAF demand outlook
 - Long-term hydrogen demand in Europe for aviation sector

Marine fuel

- Introduction to marine bunker fuel
- International Maritime Organization (IMO) decarbonization goals
- Analysis of potential low carbon bunker fuels (ammonia, methanol, and hydrogen)
- Demand:
 - APAC long-term marine fuel demand
 - Long-term APAC e-fuel demand
 - Long-term hydrogen demand in marine sector
