Key features

- Daily price assessments delivered at the end of each day.
- Time stamped using the appropriate market’s daily settlement time.
- Independent and transparent market-appropriate methodology.
- Delivery options: Your choice of data feed, our third party partners, Argus Direct, FTP, API, excel add-in or email.

How clients use our data:
A proven, reliable tool for analytical and risk-management processes, including:
- Mark-to-market (MTM) accounting
- Forward curve validation
- Value-at-risk (VaR)
- Potential future exposure (PFE)
- Deal valuation
- Regression analysis
- Scenario analysis

Customers that benefit:
This service is essential for anyone with exposure to the global coal markets.

- Risk managers
- Planning and budget analysts
- Market analysts
- Traders and trade analysts

Our methodology
We produce reliable, representative price assessments of commodity market values, free from distortion and representative of fair market values. Argus Forward Curves are assessments of market value for forward contracts and financial swaps contracts at predetermined time periods such as months and calendar years. Forward contracts allow for physical delivery of the product, and financial swaps settle against a published index. Forward curve prices are not forecasts of future values, but instead are assessments of the price of delivery of a commodity at a future date if transacted today.

Try it out - Explore Argus forward curves data with a trial
You’ll be able to experience the benefits of:

- Reliable, unbiased information
- Complete and timely data sets
- Convenient data delivery
