Argus Marine Fuels Forward Curves

For the US, Europe and Asia

What has Argus launched?

To enable industry participants to measure risk, improve mark-to-market accounting, calculate profits/losses, and properly value assets, we have introduced forward prices for key marine fuels, at key trade hubs. We publish forward prices at the US Gulf coast (USGC), New York Harbor (NYH), Northwest Europe (NWE) and Singapore.

What do these prices represent?

These prices look 24 months forward—by month, with differentials to futures agreements, with regional time stamps. These forward prices are published in Argus Marine Fuels Forward Curves.

Region	Description
US	USGC fuel oil 0.5%
	NYH fuel oil 0.5%
	NYH MGO 0.5%
	NYH Fuel Oil 1%
	USGC Fuel Oil 3.0%
Europe	NWE fuel oil 0.5%
	NWE VGO 0.5%
	NWE MGO 0.1%
	NWE HS Fuel Oil
	NWE LS Fuel Oil
Asia	Singapore HS 380cst fuel oil
	Singapore fuel oil 0.5%
	Singapore MGO 0.1%

Why Argus?

Our proprietary models and algorithms, paired with access to market data via our editorial desks, enables Argus to deliver the most market-reflective forward prices. We provide independently generated prices based on a proven methodology. Our independence and ability to collect market data from the entire market means our prices reflect more of what is going on in today's transactions. In addition to providing forward prices, Argus delivers client support when you need it to ensure your operations run smoothly.

To request sample forward price data, please contact us at USSales@argusmedia.com.
