

Argus Marine Fuels IMO 2020-Compliant Price Assessments

A new price index, an emerging benchmark

Following the introduction of the global marine fuel sulphur cap in January, shipowners are mostly burning 0.5% sulphur fuel oil, with MGO taking a back seat. The high sulphur fuel oil price premium has narrowed, with 0.5% sulphur fuel oil readily available at the major bunkering ports. Shipowners who invested in scrubbers are now seeing the time for the return on their investment lengthening.

Argus publishes more than 80 IMO-compliant price assessments, covering the world's most important bunker hubs. Our global portfolio of assessments accurately captures price movements and take into consideration different specifications. They provide you with a rigorous pricing alternative to differentials and are the most appropriate price solution for the new very low sulphur marine fuels market.

The **Argus Marine Fuels report** is a must-have for anyone involved with shipping, refining and trading of marine fuels.

Argus IMO 0.5% fuel oil assessments

Delivery sizes:

-  Bunker (100-3,000t)
-  Barge (1,000-16,000t)
-  Cargo (20,000-40,000t)

*Posted prices

- Trafigura, Bahia Blanca
- Petrobras, Brazil
- Saudi Aramco, Saudi Arabia
- CPC, Taiwan
