Argus Net Zero Europe

Argus Net Zero Europe publishes prices of European electricity guarantees of origin, news, market commentary and analysis.

The report is published weekly on Friday. A publication schedule is available at www.argusmedia.com.

The latest daily price assessments are published in Friday's print report. Daily prices are available via Argus Direct, data feeds and other digital channels.

European guarantees of origin (GOOs)

European guarantees of origin are defined by the year in which the electricity was produced. Prices are published for the previous year, the current year and three forward years.

GOO prices are published for

- Nordic hydro
- European wind
- European solar
- European biomass

See the [Argus European Electricity methodology](#) for more information.

UK guarantees of origin (Regos)

UK renewable guarantees of origin (Regos) are defined by the compliance period for which the Rego applies. Prices are published for the current compliance period and two compliance periods ahead.

Rego prices are published for

- UK non-biomass
- UK biomass

See the [Argus European Electricity methodology](#) for more information.
