

# Argus Scrap Markets

Global and regional ferrous and non-ferrous scrap price assessments supported by market leading news

## Supporting the global scrap markets with trusted market expertise

Argus Scrap Markets delivers independent pricing, expert analysis and strategic insights across the global scrap market, covering both ferrous and non-ferrous scrap. Our service helps recyclers, traders, steel producers and industrial manufacturers make confident decisions in fast-changing conditions. With robust coverage of non-ferrous scrap metal prices, scrap steel prices, specialty scrap prices and localised assessments worldwide, Argus provides clarity and transparency in one of the most dynamic sectors of the metals industry.

## Scrap markets coverage

Argus Scrap Markets gives you access to market-leading and independently assessed prices, news and analysis across the global markets, accessible via a client portal, customisable alerts, a daily PDF report and a variety of downloadable data files.

### Ferrous scrap price assessments

- **Bundles #1** bundles including 4A/4C new steel bales and tin cans from the most active steel production regions across the US, Canada, the UK and Turkey
- **Busheling #1** busheling including E8/8B/12A/12C with regional US and Canadian prices, in addition to national pricing for Italy, Mexico, the UK and Turkey
- **Foundry and specialty** Includes scrap cast iron and black/foundry regionally across the US and Canada
- **Heavy melt** Regional HMS prices across the US and Canada, regional prices for European E1/E2/E3/E8, European and Asian prices for HMS ½ and Asian H1/H2/A3
- **Machine shop turnings** Regional US and Canadian pricing, in addition to Germany E5 and European containerised
- **Plate and structural** P&S 5 ft across regional US locations, Canada and Mexico. Scrap bonus/A3B/OA from Russia, Turkey and the UK
- **Shredded** Shredded scrap across major US and Canadian trading locations and Turkey, and 3B/5A/5C containerised across Asia and Europe
- **Tool Steel** US prices for H13, M1, M42, T1, and T15 tool steel

### Stainless/alloys price assessments

- **Stainless steel scrap** 304 and 316 solids from Europe, India, Japan, South Korea and Taiwan, and regional US stainless steel scrap prices for 201, 301, 304, 309, 301, 310, 316, 330, 409/410 and 430
- **Inconel** US prices for 600, 601, 617, 625 and 718 scrap
- **Cupro-nickel and super alloys scrap**
- **Nickel premiums and scrap**

### Non-ferrous scrap price assessments

- **Copper and brass scrap #1** copper and #2 copper from the US, Asia and Europe
- **Aluminum scrap** Including Asian taint/tabor, tense, Zorba and metallurgical grade, European 6063, P1020, taint/tabor, tense and wheels and US 6061, 6063, P1020, extrusions, clips, wheels, UBCs, radiators, MLC, twitch, tweak, turnings, Zorba, siding and mixed solids/turnings
- **Zinc scrap** US galvanisers, diecast, secondary alloys (ZAMAK grades)
- **Secondary alloys** Secondary and die casting alloys including A356, A380, 319, B390, ADC12, DIN226, DIN230, DIN231 and DIN239
- **Exchange data** Data from the London Metal Exchange, Chicago Mercantile Exchange and Shanghai Futures Exchange, with real-time options available
- **Alloy calculator** Provides a fast, accurate way to convert alloy element prices into total melt cost values, including over 200 predefined common alloys to simplify analysis and support confident cost decisions

## The Argus Scrap Markets Service also includes:

### News Delivered to Your Preferences

Our team delivers the latest updates from the global ferrous and non-ferrous scrap markets, including trade flows, pricing trends and market drivers. Choose the format that works best for you — access through the Argus client portal, receive market briefing emails or download our end-of-day PDF report.

### Powerful analytics tools

Access and customise insights with dynamic dashboards, advanced charting and localised currency conversions. Integrate data feeds and optimise alloy blends with our Alloy Calculator — all designed to streamline your workflow with support from our local teams.

### Rich supplementary raw data sets in Excel Data & Downloads

Price trends do not happen in isolation — market fundamentals provide the context you need to understand what drives them. Our

downloadable Excel data sets empower you to analyse trade flows, build custom charts and uncover correlations that can signal future price movements.

### Available data sets:

- US bulk ferrous scrap vessel exports and imports
- Turkish ferrous scrap import deals
- US steel capacity addition tracker
- US monthly exports by scrap grade
- US monthly iron metallics and scrap imports
- US port-level ferrous scrap metal exports
- Bulk deep-sea ARAG shipments
- Bulk deep-sea UK shipments

## Key features

### Independent pricing:

Argus provides unbiased, market-reflective price assessments for ferrous and non-ferrous scrap, trusted globally for contracts and trade.

### Localised coverage:

Access regional scrap metal and scrap steel prices for hundreds of grades worldwide, supported by expert commentary.

### Global benchmarks:

Argus indexes are recognised internationally as reliable references for scrap pricing, ensuring transparency and consistency.

### Daily market intelligence:

Stay informed with current scrap pricing, supply-demand trends and insights on cost pressures.

### Transparent methodology:

Our industry-tested methodologies ensure every price reflects authentic trading dynamics and real market fundamentals.

### Risk management tools:

Use contextual data and analytics to support smarter procurement, hedging strategies and long-term planning.

## Customers that benefit:

The Argus Scrap Markets service is global in scope and offers localised pricing and powerful analytical tools, making it an essential resource for scrap industry professionals. Below are examples of how different participants use this service:

### Manufacturers and service centres

Manufacturers and service centres generating ferrous and non ferrous scrap through their production and processing operations use Argus benchmarks to index the scrap they sell to recyclers, giving them confidence that they are receiving fair, transparent market value. Access to reliable price assessments also helps them better understand how their material is valued in the wider scrap market, supporting stronger margins and more informed commercial decisions.

### Scrap processors

Scrap processors rely on Argus' ferrous and non-ferrous scrap price assessments as a trusted mechanism for contract settlement and indexation with counterparties. Daily market news and pricing updates provide critical insights into regional dynamics, helping processors negotiate effectively, manage risk and optimise their purchasing strategies.

### Steel mill buyers

Steel mill buyers and their scrapyards suppliers reference Argus Scrap Markets in settlement pricing for delivered scrap. Argus regional supply-demand intelligence informs short and medium-term procurement strategies, helping mills to secure consistent, specification-appropriate scrap at competitive prices.
