

Argus Biofuels Analytics

Fueling your business with critical insights and long-term analysis on the global biofuels market to make profitable data-driven decisions

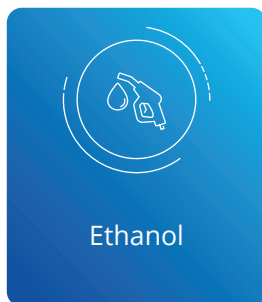

Argus Biofuels Analytics is written by experienced analysts from across the globe and brings together clear market insights to help you better understand the global biofuels markets.

The Biofuels Analytics service covers biodiesel, ethanol, renewable diesel/HVO, sustainable aviation fuel (SAF), and key renewable feedstocks markets. It includes quarterly analysis along with the underlying data in excel, giving you essential mid to long-term analysis and outlooks for global biofuels markets, making the future easier to understand.

Markets covered

Biodiesel

Ethanol

Renewable diesel/HVO

Sustainable aviation fuel

Key renewable feedstocks

Product features

- **Biofuels fundamentals analysis:**
 - Demand
 - Feedstocks
 - Supply and trade
 - Prices, costs and margins
 - Policy and regulation reviews
- **Global supply and demand, price and capacity forecasts out to 2035 for biodiesel, ethanol, HVO/renewable diesel, SAF and corresponding feedstocks**
- **Access to data in Excel**

Making the future easier to understand by:

- Improving operational efficiency and profitability with insights into future demand, supply, costs and capacity
- Discovering new sources of revenue and growth
- Gaining insights into key challenges ahead
- Understanding implications of current and future regulations
- Optimising portfolio performance with a clear view of biofuel product market leaders

Comprehensive coverage including:

Global Sections

- Global market updates
- Focus on key market developments and trends
- Updated quarterly

Regional Spotlights

- Spotlights on 3-4 regions in each quarterly report
- Europe, North America, South America, Asia-Pacific
- Analysis on regulation, demand, supply, feedstocks

Data And Downloads

- Detailed Excel figures from content published in the quarterly reports
- Updated quarterly

Global Overview

- Executive summary
- Demand
- Supply
- Feedstocks
- Trade
- Prices
- Project / product reviews
- Regional market spotlights

Examples

- European supply landscape
- US corn and soybean balance
- Brazil CBios credit market
- Asia-Pacific biofuels regulation
- China HVO supply and regulation
- North-South America ethanol trade
- US RD and SAF demand
- Analysis of European feedstocks

Data And Downloads

- Global biofuels production capacity
- Country-level capacity
- Global legislative overview
- Biofuels production
- Biofuels and feedstock demand
- Biofuels and feedstock trade
- Feedstock prices
- Biofuels prices

Explore Argus Biofuels Analytics in more detail

The Argus Biofuels Analytics service is a part of Argus' full biofuels market solution — providing in-depth pricing and market analysis across the entire global renewable fuel supply chain, from original feedstocks to finished fuels.

You will be able to experience the benefits of:

Reliable, unbiased information | Complete and timely data sets | Convenient data delivery
