

# Argus Pipe Logix OCTG Service

The Argus OCTG Service is the industry-leading price and market analysis resource for the oil country tubular goods (OCTG) sector. Tailored to the needs of the OCTG supply chain, end users and market investors, our OCTG Service provides access to key industry reference prices, best-in-class reports, market insights, fundamentals, data and news specific to the OCTG market.

## Home of the Pipe Logix Index—the industry standard for OCTG pricing

The Pipe Logix OCTG Index is the most widely used price assessment published by any OCTG pricing service and is used by the largest participants in the oilfield tubular market. We uniquely pair decades of the historical pricing trends of the industry-leading Pipe Logix Index with data-driven insights and expert analysis into accurate outlooks and forecasts.

## OCTG market coverage and delivery

### Price assessments

The monthly OCTG Price Guide covers 32 categories of tubing, production casing and surface casing. Covered grades include:

- J55
- L80 and L80HC
- P110HC

We also publish the Pipe Logix ERW Index, the Pipe Logix SML Index and the Pipe Logix All Items Index, which are used by the largest participants in the oilfield tubular market to settle sales contracts. Average prices for each item over the past three months are provided in the report.

### OCTG outlook

The Argus OCTG Outlook is a bi-monthly report that analyses critical drivers to pricing, market fundamentals, and price forecasts for the OCTG market. The six issues each year provide a comprehensive view of OCTG supply and demand, including domestic supply, imports, active rigs, raw material price trends and other critical drivers of the OCTG industry.

### OCTG price forecasts

The complexity of the OCTG market means expert analysis is needed for accurate forecasting. The November and May issues of the OCTG Outlook feature an OCTG price forecast. Built by Argus OCTG market experts with years of experience, our data-driven insights are critical to ensuring strategic decision-making and optimising profitability.

### Historical data

Access 20+ years of historical OCTG pipe price data with the Argus OCTG Service through the innovative Argus Direct platform.

### Industry news and market-moving commentaries

Our expert team of metals market reporters publish the latest news stories and commentaries from across the OCTG market in real time on the Argus Direct client portal.

### Instant access on Argus Direct Workspace

Argus Direct brings to life the data, news and analysis that we publish, ensuring you have the latest insights at your fingertips. This interactive and immersive platform allows you to access our insights through dynamic dashboards, innovative tools and PDF publications. Customise your dashboard with real-time market news, charts, assessments and derived prices with our intuitive drag-and-drop interface.

## Key features

Monthly price assessments delivered on the last Wednesday of each month

Independent and transparent market-appropriate methodology

A complete view of the OCTG market — prices, sentiment, forecasts and fundamentals

Delivery options: Argus Direct, FTP, API, Excel add-in or email

## Customers that benefit:

The Argus Pipe Logix OCTG Service is essential for all those involved in the OCTG supply and demand chain. Below are some examples of how clients use this service:

### OCTG and steel mills

Our assessments are applied to long term price contracts as well as for calculations and adjustment factors to official selling prices. Our detailed analysis helps mills anticipate market movements and better allocate resources and optimize production schedules.

### Pipe distributors

The accuracy and transparency of our indexes help distributors determine the price at which they should buy product from suppliers and sell it to end users, helping them identify opportunities for better margins.

### Oil and gas companies

Our price data is used to guide strategy for the procurement of tubular goods. Supply chain and category managers use our price assessments when negotiating contracts for programme purchases and our historical data to identify beneficial pricing trends.

### Financial institutions and analysts

Our OCTG market analysis aids users' investment decisions in publicly traded mills. Be assured that our assessments are impartial and reliable indicators of the OCTG industry.

## Our methodology:

The Argus Pipe Logix OCTG Service is underpinned by the most robust, transparent and credible methodology, developed with the industry to ensure our price assessments are a true reflection of the US OCTG spot market.
