Subject: Formal comment on change of name of POME assessments

Notice: external email – please use caution.

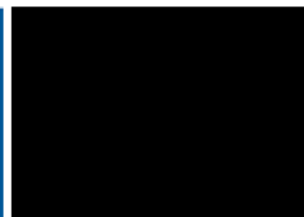

Dear [REDACTED]
Dear Argus Team

ISCC supports the proposal by Argus to change the name of all POME assessments to "POME Oil" to more accurately describe the physical product being assessed.

The term POME oil is also used by ISCC in the list of [materials that are eligible for ISCC EU certification](#). The wording of materials as stated in the list has to be used by certification bodies on the material annex to the certificate and has also to be used by ISCC certified companies on outgoing sustainability declarations/proofs of sustainability.
The [ISCC Guidance](#) for waste and residues from palm oil mills is also referring to POME oil.

With kind regards,

[REDACTED]
